

Donald Beautification Group Meeting Notes November 18, 2019

Tire Land: We discussed the tire land and learned that the paint is very durable and should last 4-6 years with serious wear and tear which is really great news. We are now working on getting the map completed for layout. We will most likely place the large tractor tire first to see how to complete the layout.

Restroom: The septic tank is installed and we are now waiting for construction to begin!

Park Ribbon Cutting Activities: Gerry proposed a park naming contest that would be unveiled at the Ribbon Cutting ceremony.

Santa Sing Along: The rest of the meeting was a work session for our crafts. We had five young people set up to do the crafts and Connie was instructing and timing the projects to see how it would go on the day of the event. The adults make kits for the crafts and put together the songbooks.

Next meeting is: December 16, 2019 at 6:30pm at City Hall.
